

THERM 250

Thermoregulation device for small animals

- Rectal probe
- Burning protection
- Warming pad cover ULTRAFRESH® treatment

COMPATIBLE
IRM

■ FUNCTIONS

- Regulation of body temperature from 30 to 45 ° C.
- over-heating safety and alarm
- Temperature memorization.

■ TECHNICAL CHARACTERISTICS

- Double temperature sensor: one rectal probe + one pad probe for total safety of the animal.
- Warming pad 200 x 300 mm ULTRAFRESH® treated: antifungal and antimicrobial ultra resistant.
- Infrared heating technology

■ OPTIONS

- THERMTAB
POMC warming experimentation plate 250 x 100mm
- THERM500
warming pad 500 x 500 mm
